TESTIMONIALS

"It feels special to be the part of East Point. Came here with expectation to become an engineer, got the degree along with placement. Thanks to all the faculty members and my classmates for their constant support during the academics. College infrastructure is too good - Library, Laboratories, Canteen, Play-Ground and Big Green Campus.

Management of the college is very much supportive when it comes to "betterment of the students". Best moment to share is the Placement opportunities we got at campus, I secured multiple offers and have joined the organization with **CTC of 25 LPA**, thanks to team placement for the year never ending support."

★★★★★

"I am from CSE-EPCET, got placed in multiple companies in my 7th semester. EPCET is one of the best colleges in Bangalore when it comes to academics and placements. The state of art infrastructure, well equipped laboratories and library with variety of books and journals - motivates us towards academics. Thanks to our highly talented faculties for their kind support. The T&P cell takes at-most care of students both in - training and placements.

Industry courses like: Cisco, AWS, Saleforce, UiPath, Oracle ETC. prode to be an EPCETian..."

★★★★★

"I am Emmanuel from EPCET Pursuing my Engineering in ISE. The placement and training cell, combined with the institution has given me abundant information on being a great candidate for any software company that comes our way. These knowledgeable training and mentorship provided helps me and my friends to take care of our career and goals.

With this, also comes the greenary of the campus and it's grand annual fest - Samksruthi. Although I am only in my third year, I have had the opportunity to take full part in the fest and college activities . I have completed two internships as AI & ML and full stake Devloper."
