Department of Computer Science & Engineering

Course Name: Java Foundations

The Java Foundations curriculum offered by Oracle Academy is designed to provide students with a strong foundation in Java programming. This comprehensive program covers essential Java concepts, including syntax, object-oriented programming principles, data structures, and algorithm development. Students gain hands-on experience through practical exercises and projects, honing their skills in writing, debugging, and testing Java code. Oracle Academy's Java Foundations curriculum is a valuable resource for educators and students alike, equipping them with the knowledge and skills necessary to pursue careers in software development, web application programming, and other fields that leverage Java as a fundamental programming language. The course provides programming concepts, object-oriented concepts, terminology, syntax and steps required to create basic Java programs.
