Department of Electronics and Communication Engineering
IoT (Internet of Things) Technology

BROCHURE:
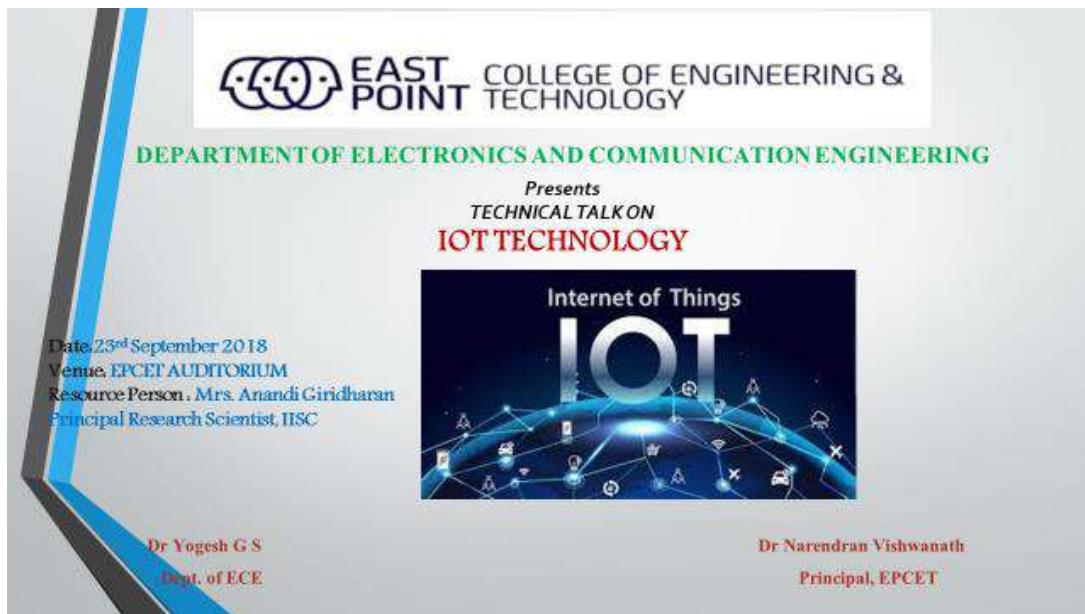

In East Point College of Engineering and Technology, Bangalore, Department Of Electronics and Communication Engineering conducted a One Day Technical Seminar on **IoT (Internet of Things) Technology.**

23rd September 2018

The seminar was inaugurated by Dr Narendra Vishwanath, Principal-EPCET, Bangalore in the august presence of Dr. Yogesh G S, HOD, Department of ECE, EPCET.

In the inaugural talk 'Emerging Trends of IOT',Dr.Vijaya Kumar B. P, Professor and HOD, Dept. of ISE, MSRIT gave an overview on IoT. He gave simple examples on how his life is being connected to IoT in his daily routine. He spoke about the areas like smart infrastructure, health care, retail and transportation in which various applications could be developed. His inquisitiveness towards this domain led him to write a paper on NFC retail as he was also a part of the retail sector earlier. He made a video presentation about Amazon Go, which revealed about smart shopping and gave an idea of how IoT going to rule the future world. He also spoke about the technologies being used in health care and the development and need for a smart home in coming future. He pointed out a number of emerging trends based on IoT. He also touched areas like sports, i.e. cricket being connected with IoT as there are talks that Intel is merging with ICC. He discussed the threats and challenges behind IoT which is equally something we need to think of. He ended his presentation with a beautiful video on Samsung display which makes visualization easier. His thought provoking presentation led many students to ask him quite a few doubts and interaction with him.

Department of Electronics and Communication Engineering

Mrs. Anandi Giridharan, Principal Research Scientist, Dept. Of Electrical Communication Engg. , IISC gave a technical speech on Block Chain and Smart Contract. It started at an enthusiastic note and was sure to match the wavelength of his audience with that of the orator, with his simple, easily understandable and interactive speech. She explained what Block Chains are by comparing it to the internet technology. She stated that internet is used for information exchange whereas Block Chains are used for financial exchange across various media without a centralized controlling party. She introduced the currently existing concept of Bit coins and its usage in Block Chain technology for transactions across peer to peer distributed networks. She also gave a gist of how Block Chains can be implemented in the very near future and the obvious applications of it. Smart Contracts was the other topic she enlightened the audience about. She then explained the advantages, challenges and possible applications of the Smart Contract which, according to him, is a very genuine way of transactions that required only lines of code that define the manual contract between the seller and the buyer. This time-efficient, trustworthy technology will be much welcomed when it takes over in the recent years.

Ms. Gayathri Devi B. R, Royal bank of Scotland, Secretary IEEE CIS B'lore Chapter delivered an expert talk on Entrepreneurship opportunities for IOT. She gave a brief description of IOT and its applications. He spoke about the most fascinating gesture control in games which is quite popular right now. He stated a simple theory of how to become an entrepreneur, which was think of an idea, make a prototype and structure the revenue model. The most interesting part of the seminar was the description of E – sensors which was based on machine language and predictive analysis .She had brought a working model of the E-sensor he had constructed and shared his knowledge on it. Many students got to try out how the e – sensors actually worked.

T D Sai Keerthi, Research Scholar, Dept, Electrical communication Engg. IISC continued to inspire with his wonderful presentation. The students were are all were very excited to listen to the humorous yet a Knowledgeable seminar. The final session on IoT Technology was presented by Dr.Vijaya Kumar B. P, Professor and HOD, Dept. of ISE, MSRIT. He began by briefing the audience about the various sectors of IoT including its major role in defense, commercial and industrial sectors. He spoke about the upcoming ideas of smart cities and home automation all across the world. Subsequently, he went in depth into the challenges faced at the time of implementation of IoT by designers and programmers.

LINE FOLLOWING ROBOT WORKSHOP

BROCHURE:
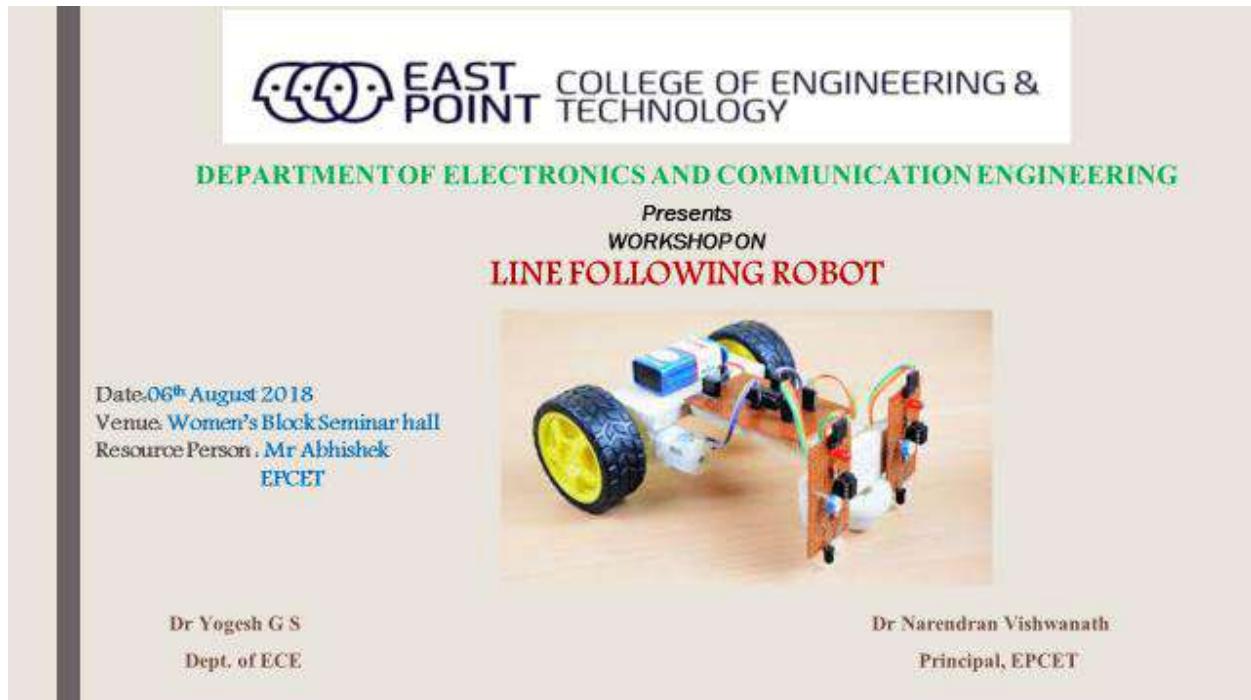

On 6TH of August 2018, EAST POINT IEEE STUDENT branch successfully conducted a workshop on design of a Line Following Robot where Mr. Abhilash K N exhibited the procedure to design a Line following Robot using Combinational Circuits as a base. The gathered 52 participants were endowed with this knowledge.

MATRIX LED DISPLAY

BROCHURE:
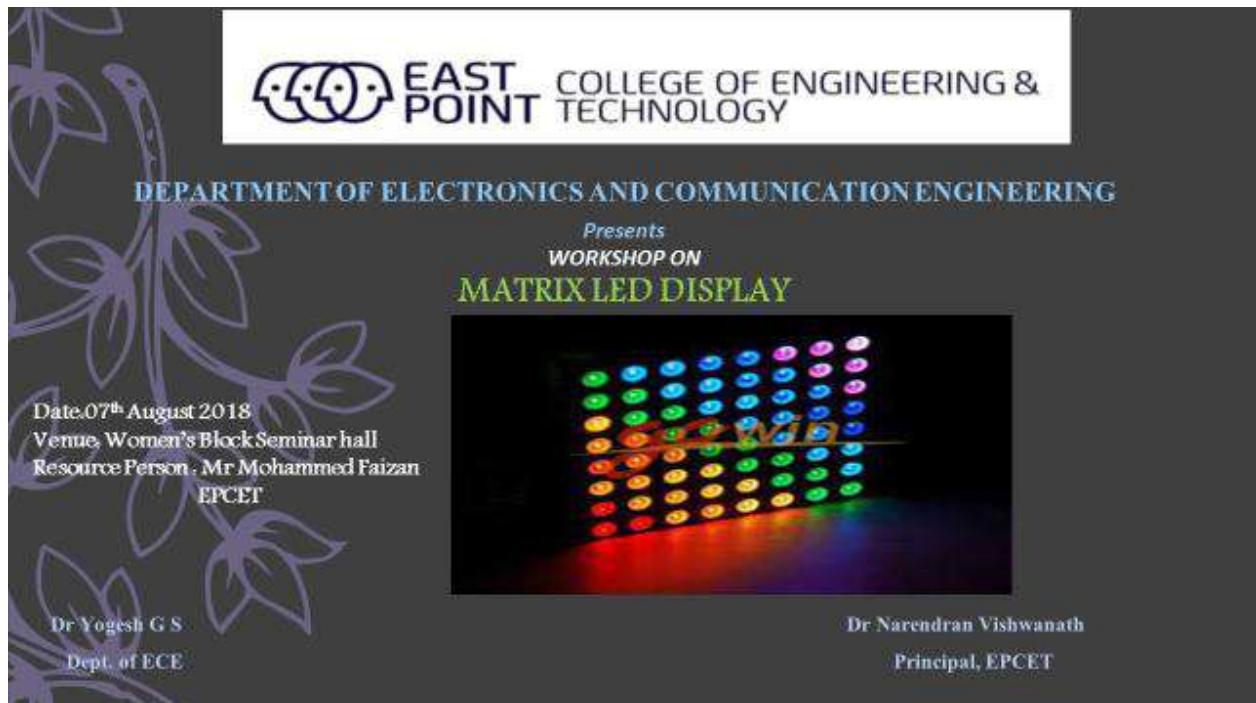

On 7TH August 2018, the day following the LINE FOLLOWER ROBOT WORKSHOP, EPCET IEEE Student Branch hosted a workshop on MATRIX LED DISPLAY led by Mr. Mohammed Faizan. , who educated on the design and working of the Matrix Led proficiently.

Full LED matrix headlights consist of an LED module for the dipped and high beam, three further LED high beam segments, a static LED cornering light, and a narrow LED strip providing the indicators, daytime running, and position lights.

ROBOTICS TECHNOLOGY DEMOSTRATION

BROCHURE:
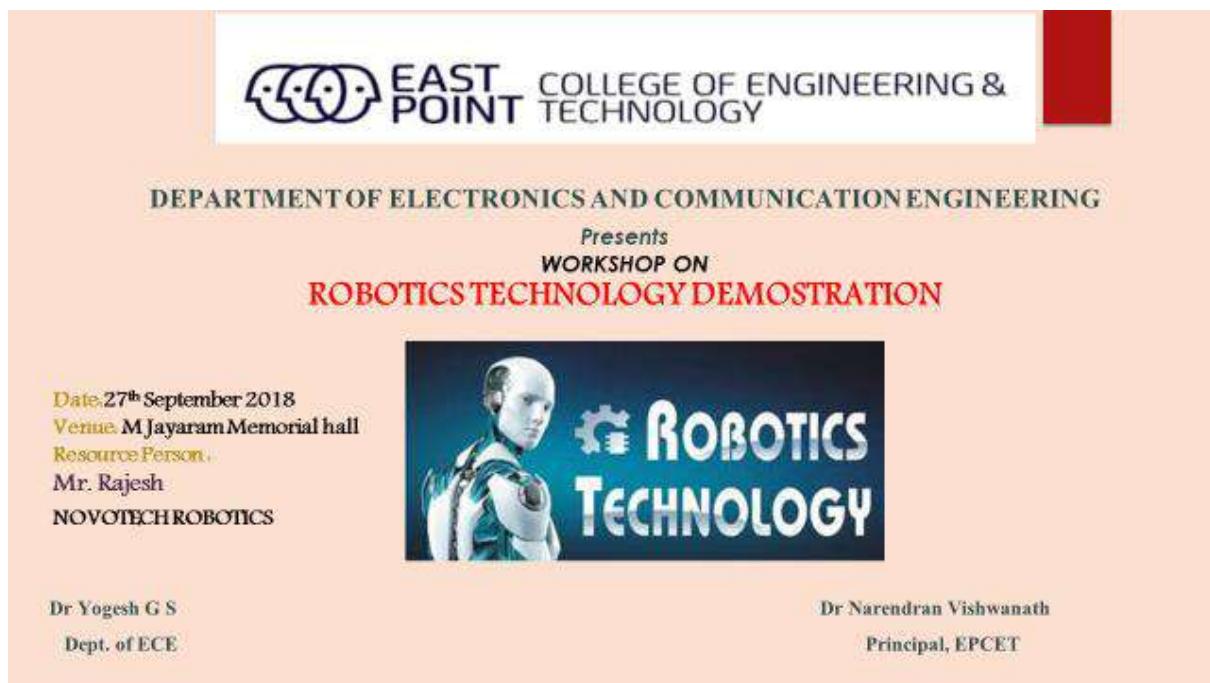

THE ROBOTIC TECHNOLOGY DEMONSTRATION was done on 27th September of 2018. Mr. Rajesh, representative and trainer at NOVOTECH ROBOTICS demonstrated various robots which of those include SWARM robots, Gesture Controlled Robots, Voice Controlled Robots in the presence of 73 participants.

The workshop brought a clearer perspective about the robotic technologies among the students.

AIKYA'18

BROCHURE:

AIKYA'18 a technical fest was conducted on the 2nd of November 2018.The Event raised its curtains with a tech-talk spoken by Mr. Ananth Mallya and Shilpa. Aikya'18 was a technical event of competitions comprised of 3 sub-events

➢ KAAGAD, Paper Presentation Competition

➢ Insight, Project Exhibition Competition

➢ TechTantra, Tech Quiz
