

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Program Specific Outcomes (PSO'S)

PSO 1: To conceptualize, model, design, simulate, analyse, develop, test, and validate computing systems and solve technical problems arising in the field of Computer Science & Engineering.

PSO 2: To specialize in the sub-areas of Computer Science and Engineering such as Cloud Computing, Robotic Process Automation, Cyber Security, Big data Analytics, User Interface Design and IOT to meet industry requirements.

PSO 3: To build innovative solutions to meet the demands of the industry using appropriate tools and techniques.
