Venue	Online				
Duration	1Hrs	From:	11:00AM	To:	12.00PM
Program Objective	<ul style="list-style-type: none"> Educate students about the diverse engineering roles available in carrier operations within the Navy. Engineers play a critical role in designing, maintaining, and upgrading aircraft, ship systems, communications networks, and other cutting-edge technologies crucial for carrier operations. 				
<p>Sea Careers: Exploring Opportunities Beyond the Horizon" is a comprehensive exploration of the diverse career paths available in maritime industries. This presentation delves into the myriad roles from naval engineering to marine biology, highlighting the pivotal roles these professions play in global commerce, defense, and environmental stewardship. Participants will gain insights into the technological innovations driving maritime operations and the skills required to thrive in these dynamic fields. The talk emphasizes the unique challenges and rewards of sea careers, inspiring attendees to consider how their interests and skills can contribute to a meaningful career at sea. By showcasing real-world applications and highlighting the importance of engineering expertise in maritime defense and operations, the talk seeks to inspire students to explore careers that combine their technical skills with a sense of purpose and national service.</p>
