

Faculty	Dr Rajani K C AssociateProfessor– Computer Science & Engineering EastPointCollegeofEngineering&Technology
	Rajani Kallhalli Channarayappa is the Associate Professor in Department of CSE in the East Point college of Engineering and Technology, K R Puram, Blore at VTU, Belgaum. I completed B.E from NCET, and MTech from Atria Institute of Technology. I completed Ph.D under VTU. Her Research Interest focuses on Mobile ad-hoc networks, wireless sensor networks, WANET'S and Machine Learning. I have many publications on Isolating Routing Misbehavior problems in Mobile ad hoc networks. I had more than 8 years of Teaching Experience worked as Assistant Professor in various colleges like NCET, SRSIT, and PRESIDENCY UNIVERSITY. During My career I taught Students with various subjects to students like C# Programming and .net, DBMS, OOMD, FS, SE, ST, Web Programming, CO, C-Programming and C++. My vision is to be to be a successful Teacher by Incorporating Good Teaching Valuesand To Provide students a quality in Teaching. Email id: rajanikcc009@gmail.com
	Publications. 1. A review on multicasting routing protocols for mobile ad-hoc wireless networks International Conference on Communication and Signal Processing (ICCSP). 2. An efficient security framework for intrusion detection and prevention in internet -of-things using machine learning technique International Journal of Electrical and Computer Engineering (IJECE). 2. Securing Dynamic Source Routing by Neighborhood Monitoring in Wireless Adhoc International Journal of Advanced Computer Science and Applications. 3. Friendly group architecture for securely promoting selfish node cooperation in wireless ad-hoc International Journal of Advanced Computer Science and Application. 4. A Multi-Biometrics System Based on the IRIS Using Convolutional Neural Networks, in Mechatronics Systems: Industry 4.0 Perspectives, 177-188. 5. Novel Artificial-Intelligence Based Navigation Modelling for Unmanned Vehicular System IEEE International Conference on Intelligent Signal Processing. 6. Relational Model and Improvised DSR Assisted Framework for Secure Wireless Communication International Conference on Computing Science, Communication and Security. Achievements/Awards/Recognitions • Recognized as Research Supervisor under VTU • Received 100% results under VTU • Reviewer for EURASIP Journal
