Faculty	**Mr. Dadi Sai Eswar** **Assistant Professor – Computer Science & Engineering** **East Point College of Engineering & Technology**
	Mr. Dadi Sai Eswar completed his Integrated Master of Technology (M.Tech.) in Computer Science and Engineering from VIT-AP University in 2026. His technical interests include Artificial Intelligence, Machine Learning, Deep Learning, Full-Stack Web Development, Software Engineering, and Cybersecurity. His project work includes a Medicinal Plant Identification System using deep learning and image processing, a Wealth Management Solution using web technologies, and a Malicious URL Detection System using machine learning techniques. He is also interested in integrating practical demonstrations, project-based learning, and real-world applications into teaching to help students develop strong technical foundations and problem-solving skills.
	Achievements / Awards / Recognitions
	• - Developed a Medicinal Plant and Leaf Identification System using deep learning, achieving 95% validation accuracy. • - Developed a Machine Learning-based Malicious URL Detection System, achieving 96.72% accuracy. • - Built a Student REST API using Flask and implemented automated testing using Python, Pytest, and Requests. • - Secured 2nd place in the Hashbreakers event conducted by the NGC Club. • - Served as Team Lead of the college Technical Club, demonstrating leadership, teamwork, and coordination skills.
